Division of Occupational Therapy

Admissions Vision
The Ohio State University Division of Occupational Therapy seeks self-directed learners who are resilient, insightful and ethical. Ideal candidates are motivated to become empathetic occupational therapists providing evidence-based, collaborative, client-centered care. The Division selects students who display diversity in background, experience and thought and demonstrate the potential to improve people’s lives through innovation, excellence, and leadership in practice, research, education, and community service.

Program Vision
We will be globally recognized as a preeminent occupational therapy program at the forefront of scholarship, leadership and research in education, service and practice.

Program Mission
Our mission is to improve lives through innovation in research, service and education. We will prepare highly qualified, ethical entry-level occupational therapists that support the health and well-being of the people of Ohio and the global community.

Our Division of Occupational Therapy is housed within the larger School of health and Rehabilitation Sciences, which is within the College of Medicine at The Ohio State University. Students in our occupational therapy program are students in the Graduate School at The Ohio State University. Links to the handbook for the School of Health and Rehabilitation Sciences (HRS) and the Graduate School handbook are provided throughout this document for specifics.

What Is Occupational Therapy?

Occupational therapists and occupational therapy assistants help people across the lifespan participate in the things they want and need to do through the therapeutic use of everyday activities (occupations). Common occupational therapy interventions include helping children with disabilities to participate fully in school and social situations, helping people recovering from injury to regain skills, and providing supports for older adults experiencing physical and cognitive changes. Occupational therapy services typically include:

- an individualized evaluation, during which the client/family and occupational therapist determine the person’s goals,
- customized intervention to improve the person’s ability to perform daily activities and reach the goals, and
- outcomes evaluations to ensure that the goals are being met and/or make changes to the intervention plan.

Occupational therapy services may include comprehensive evaluations of the client’s home and other environments (e.g., workplace, school), recommendations for adaptive equipment and training in its use, and guidance and education for family members and caregivers. Occupational therapy practitioners have a holistic perspective, in which the focus is on adapting the environment to fit the person, and the person is an integral part of the therapy team.
ACCREDITATION INFORMATION

The Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) accredits Occupational Therapy Programs. Additional information can be found at www.acoteonline.org or www.aota.org

The Doctor of Occupational Therapy (OTD) program at The Ohio State University is fully accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) through 2023. The OSU occupational therapy program has been continuously accredited since 1942. For more information, you may contact ACOTE via the information listed below.

ACOTE c/o AOTA,
4720 Montgomery Lane, Suite 200,
Bethesda, MD 20814-3449
(301) 652-2682
www.acoteonline.org

This program requires 3 years of coursework with clinical experiences, two semesters of full-time fieldwork in two different facilities and fourteen weeks in a Capstone Experience. Graduates of the OTD program are eligible to apply for the National Board of Certification Occupational Therapy examination. After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR) and is eligible for licensure in Ohio and other states.

CERTIFICATION EXAMINATION AND LICENSURE

National Board for Certification in Occupational Therapy Examination

Upon graduation from the program, students are eligible to take the Certification Examination of the National Board for Certification in Occupational Therapy, Inc. (NBCOT). The National Board for Certification in Occupational therapy (NBCOT) is the credentialing agency that provides certification for the occupational therapy profession. In order to take the NBCOT exam, all applicants for certification are required to provide information and documentation related to character questions on the examination application which are as follows: (source: https://www.nbcot.org/-/media/NBCOT/PDFs/Cert_Exam_Handbook.ashx?la=en)

1. a. Have you ever been convicted of a felony? (NOTE: Applicants must answer affirmatively even if convictions have been pardoned, expunged, released, or sealed.)
   b. Do you currently have a felony charge or charges against you?

2. a. Have you ever had any professional license, registration, or certification denied, revoked, suspended, or subject to probationary conditions by a regulatory authority or certification board, including NBCOT?
   b. Do you currently have a professional license, registration, or certification under review for possible disciplinary action?

3. a. Have you ever been found by any court, administrative, or disciplinary proceeding to have committed negligence, malpractice, recklessness, or willful or intentional misconduct which resulted in harm to another?
b. Do you currently have a charge(s) of negligence, malpractice, recklessness, or willful or intentional misconduct that resulted in harm to another against you?

4. a. Have you ever been suspended and/or expelled from a college or university?

b. Are you currently under active investigation that could lead to being suspended and/or expelled from a college or university?

The NBCOT character review also includes a background check.

If you answer YES to any of these questions, you MUST submit documentation to NBCOT as detailed in the NBCOT Certification Handbook for OTR and COTA Candidates. It is important for OT applicants and students to understand that a felony conviction could impact their eligibility to sit for the NBCOT certification examination or attain state licensure (described below)

The examination is computer administered with an on-demand schedule for testing. Detailed information about application to take the examination is available at www.nbcot.org. In the event that a student fails to complete the examination successfully, the student has can retake the examination at a future time. Successful passing of the examination leads to certification and the right to use the initials OTR after your name.

The Certification Examination of the NBCOT is presently accepted by all state licensure boards. At the time you take the examination, you can pay NBCOT to send the results to the licensure board(s) of your choice. To obtain a license to practice, you will need to complete forms, provide documentation, and pay fees that are individual to each state. Additional information about the certification examination and state licensure is located at www.nbcot.org.

National Board for Certification in Occupational Therapy, Inc.
One Bank Street
Suite 300
Gaithersburg, MD 20878

Licensure

Occupational Therapy is licensed in all 50 states, the District of Columbia and Puerto Rico. The major purpose of state regulation is to protect consumers from unqualified or unscrupulous practitioners. State laws and regulation significantly affect the practice of occupational therapy. Laws or statutes are enacted by legislators. Regulations specifically describe how the intent of the laws will be carried out and are developed by appointed public officials of various departments in state government. Both kinds of officials make decisions that directly and indirectly affect occupational therapy practitioners.

AOTA continuously monitors and analyzes state legislation and regulations affecting occupational therapy. (www.aota.org). See the Ohio Licensure Board of Occupational Therapy /Physical Therapy/Athletic Training (http://otptat.ohio.gov/) for additional information. It is important for OT students and applicants to understand the impact of a felony conviction, as described above, on their ability to secure licensure in the State in which they wish to practice.

ACADEMIC AND PROGRAM INFORMATION

Academic and Other Policies

Academic Policies and Building Information can be found in the Graduate School Handbook (https://gradsch.osu.edu/handbook), the School of Health and Rehabilitation Sciences Handbook (https://hrs.osu.edu/academics/academic-resources/student-handbooks), and the Division of Occupational Therapy Student Handbook (https://hrs.osu.edu/academics/academic-resources/student-handbooks). Other policies (e.g. building safety) can be found in the OT Office, 406 Atwell Hall above faculty mailboxes. Students are responsible for reviewing and adhering to policies and procedures detailed in these documents.

Faculty Advising

During the first summer term in the Occupational Therapy program, each student is assigned an academic advisor, who is one of the Occupational Therapy faculty members. The advisor is available for any academic matters about which the student may desire guidance. Advisors also meet with students to review professional behavior. Advising assistance is also available in the SHRS Graduate Studies Office. The student is responsible for planning for the completion of all required course work.

In Autumn of Year Two, students are assigned to a faculty academic advisor who also serves as that student’s Capstone Mentor. This may be a different advisor from the initial advisor assignment, which is an intentional decision to match students with faculty most experienced in their area of interest. This advisor will provide guidance regarding academic coursework, capstone ideas, and professional mentorship.

The School of Health and Rehabilitation Sciences Student Handbook is designed to serve as a guide for students enrolled in the professional programs of the School. The contents of this handbook represent an official communication of the policies and procedures of the School from the faculty to students enrolled in their professional programs. These policies and procedures are meant to be helpful, not restrictive. Students are expected to be familiar with policies relating to the School and the division or program in which they are enrolled. The School of Health and Rehabilitation Sciences Student Handbook can be accessed on the school’s website:

Each student is encouraged to review policies and procedures pertaining to such matters as admission, scheduling, graduation and grading, which are found in the University catalogs, handbooks, and other similar published matter. Students should become familiar with the rules and regulations that govern the University community (including the School) and campus as a whole. This handbook and the School of Health and Rehabilitation Science Student Handbook supplements, but does not replace, other University publications.  
https://hrs.osu.edu/~/media/Files/HRS/Academics/Academic-Resources/Student-Handbooks/HRS-Student-Handbook.pdf?la=en

For access to the complete Graduate School Handbook, please use this link:  
https://gradsch.osu.edu/handbook
Registration and Scheduling

Students will register for courses through Buckeyelink at https://buckeyelink.osu.edu The occupational therapy program is a set curriculum, therefore students all students have a seat and there is no waitlist. The University faculty and staff communicate with enrolled students exclusively through email, using name.#@buckeyemail.osu.edu email addresses.

The BuckeyeLink webpage also provides convenient links to several campus resources including Tuition & Fees, Financial Aid, Class Schedules and Grade Records.

Please contact Amy Darragh (amy.darragh@osumc.edu) if you experience any difficulty receiving email from the OSU Registrar’s Office or have any difficulty with on-line scheduling.

For policies regarding registration and scheduling, please see the Graduate School Handbook, section 3. https://gradsch.osu.edu/handbook

Tuition

Program tuition is available on the OSU Registrar’s Website:
https://registrar.osu.edu/FeeTables/MainFeeTables.asp

Occupational Therapy Program Requirements

The occupational therapy program is a Professional Doctoral Degree Program as described by the Graduate School at The Ohio State University. Please refer to the Graduate School Handbook for clarification on any of the below. https://gradsch.osu.edu/handbook/all#7-17

Admissions Criteria for the Graduate School can be found in section 7.17.2, and the specifics for the OTD program can be found online at https://hrs.osu.edu/academics/graduate-programs/clinical-doctorate-in-occupational-therapy

Program of Study 7.17.3. Students follow a course of study established by the professional doctoral degree program. Professional doctoral degree programs include a professional doctoral examination, final document, and exit requirement. Professional doctoral degree programs include practicum, internship, or similar clinical or professional experiences designed to provide mastery of the skills needed by doctoral-level practitioners in the field. Professional doctoral degree programs may also have additional discipline-specific requirements that reflect licensing or accreditation standards.

The OTD professional program includes 6 semesters of required classes and clinical assignments and 3 semesters of full-time clinical experiences. In their 6th and 7th semesters, students are assigned to Level II fieldwork as follows: the first occurs for the period of January and March and the second for the period of April to June. Students return to campus for classes in semester 8, and then in semester 9, they complete 14 weeks of Clinical Capstone Experience and Capstone. The total number of required credits for the OTD program is 99.
The professional curriculum courses are described in the University Course Offerings web site (https://studentlife.osu.edu/). Course schedule changes must be approved by the occupational therapy faculty. The student must petition by submitting in writing:

- Identification of the exception being requested
- Justification for this exception
- A plan for the future

In response to this, the faculty may:

- Approve the exception with modifications
- Approve the exception as presented
- Not approve the request.

</table>
Professional Doctoral Examination, 7.17.5. Students are required to take a professional doctoral examination testing the student’s understanding of the theoretical and applied fundamentals of the field as well as the student’s readiness to engage in a sustained clinical or professional experience. The timing of the professional doctoral examination is set in accordance with the requirements of professional preparation but generally precedes a sustained clinical or professional experience. Graduate Faculty Representatives do not serve on the professional doctoral examination.

In the fifth semester, OTD students must pass a comprehensive exam to remain in good standing and enter their fieldwork II courses. The comprehensive exam consists of approximately 200 questions which cover content contained in the first five semesters of the program. Questions were developed by all faculty members in each of their areas of expertise and are similar in format to the National Board for Certification of Occupational Therapists (NBCOT) Exam. One goal of the doctoral examination is to prepare the students for the NBCOT exam required for licensure to practice occupational therapy. The pass point is set at 70%.

Failure 7.17.6. Per Graduate School Rule 7.17, a student who fails the professional doctoral examination twice is not allowed an additional examination. After two unsatisfactory attempts at the professional doctoral examination, a student is not permitted to be a doctoral candidate in the same or any other graduate program at this university.

Students who fail the professional doctoral exam will receive remediation by faculty members to the satisfaction of the occupational therapy faculty members and will be permitted to retake the exam. Each student must pass the doctoral exam to progress onto fieldwork and to become a candidate for the doctoral degree.

Competency Requirement for ACOTE: Students must successfully complete all coursework, the written comprehensive exam, 24 weeks of Level II Fieldwork and pass a competency requirement prior to the commencement of the doctoral experiential component. In the eighth semester, students will complete the NBCOT OTKE as this final competency and develop a reflective plan of study in areas requiring additional knowledge.

Final Document 7.17.7. Students in professional doctoral programs submit an original final document demonstrating original thinking and the ability to evaluate research in the field analytically. Students in professional doctoral programs are expected to follow the document formatting standards of their disciplines. Each committee member indicates approval of the student’s final document by posting their decision on the Report on Final Document form that must be submitted to the Graduate School. The final version of the student’s final document is retained permanently by the student’s program. Final documents must not contain material restricted from publication.

In the OTD program, each student will complete a capstone project as the “Final Document” required by the University Graduate School. For the OTD, the capstone project will be completed as part of the Capstone Experience (described above). Several pathways for the capstone are possible. Students can complete 1) development and evaluation of a program, 2) development and evaluation of evidence-based practice (EBP) guidelines, 3) development and evaluation of a BESt. Evaluation of the programs, guidelines, evidence summaries can include individual case studies testing an outcome, implementation analyses assessing the potential for knowledge translation, a grant application addressing a knowledge gap, or similar evaluation of
evidence and the transferability to clinical practice. For all capstone options, students will complete a systematic or scoping review of a topic of interest. From the systematic or scoping reviews the students will develop a clinical guideline, program, best evidence statement, or similar (e.g. white paper). These will be implemented on their Capstone Experience with the individualized case study, implementation analysis, grant application or other implementation/outcome evaluation as approved by the student's advisor as the required documentation of guideline or program outcomes. In some cases, the student and advisor may request implementation in a site other than the Capstone Experience given site limitations or requirements. The faculty, advisor, and director of clinical and experiential education will approve these requests on a case-by-case basis.

**Exit Requirement 7.17.9.** Students are required to complete an exit requirement designed by the professional doctoral program to demonstrate candidates’ preparation for advanced practice in the profession. The exit requirement is structured around the final document.

In the OTD program, students will orally present their projects to their doctoral committee in spring semester, Year III (week 11-12). All students, clinical mentors, and occupational therapy faculty will be invited to presentations of capstone projects. The oral presentation will use the format of a national presentation (research platform) at the profession’s annual conference (AOTA), will follow a required structure approved by the OT faculty, and will include a question/answer period. Following the presentations, the doctoral committee, who will have previously reviewed the written project, will meet privately to discuss both the written document and oral presentation and will vote on whether or not the student met the oral and written requirements of the OTD degree. The site mentor will be invited to review the final document and participate in the oral defense (without a vote). The document and presentation will be judged on application of theory, analysis of research, synthesis or data, relevance and significance, and overall rigor, completeness and accuracy.

**Time to Degree 7.17.11.** Professional doctoral degree requirements must be completed within five years after a student passes the professional doctoral examination.

To allow for continuity of academic and clinical learning, the students shall complete the program, including fieldwork and Capstone Experience, within 14 semesters of the start of classes unless they have written permission, which may include a plan for remediation, from the program director to extend the timeline. However, per graduate school guidelines, the maximum time for completion is five years from doctoral examination so the program and program director cannot provide permission for completion beyond that.

Additional information regarding **minimum credit hours**, **residency** requirements and **graduation** requirements are detailed in the Graduate School handbook.

**Student Permanent Record 3.5.1.** (Graduate School Handbook, Section 3.5). The student’s official permanent record contains a list of all courses taken, grades earned, degrees earned, and dates of graduation while enrolled at this university. This record is located in the University Registrar’s Office. Unofficial records for all graduate students are maintained in the Graduate School. Students may examine their unofficial records by accessing their advising report in Buckeye Link.
Graduation Requirements:

Successful Completion of:

1. **All required Courses in the OTD, totaling a minimum of 99 credits.**
2. **Professional Doctoral Examination.** The Professional Doctoral Examination cannot be taken the same autumn or spring semester or summer term as the exit requirement or expected graduation. The student must submit an Application for Professional Exam on GRADFORMS at least two weeks prior to the scheduled date of the exam. OTD students take this exam in Autumn, Year 2. It is called the *OT Comprehensive Exam.*
3. **Final Document.** Students in professional doctoral programs submit an original final document demonstrating original thinking and the ability to evaluate research in the field analytically. *This is known as the OTD Capstone Project.* Students in professional doctoral programs are expected to follow the document formatting standards of their disciplines. Each committee member indicates approval of the student’s final document by posting their decision on the Report on Final Document in GRADFORMS. The final version of the student’s final document is retained permanently by the student’s program. Final documents must not contain material restricted from public disclosure. Final documents are due to your committee in Spring, Year 3 at least 2 weeks prior to your defense date (typically in early April).
4. **Exit Requirement.** Students are required to complete an exit requirement designed by the professional doctoral program to demonstrate candidates’ preparation for advanced application and/or practice in the profession. The exit requirement is structured around the final document. *This is an oral defense of your Capstone Project.*

Your committee will let you know if you have passed the exit requirement immediately following the defense. Any revisions to the Final Document will also be returned to you at this time. All revisions must be completed and approved by your advisor, and then a final copy of the Final Document turned in to the Division Director no later than three weeks prior to graduation.

5. **Adherence to the Graduation Calendar and requirements for Tuition and Fees.** The graduate school provides the specific dates on their Graduation calendar, and students MUST adhere to the dates: [https://gradsch.osu.edu/calendar/graduation](https://gradsch.osu.edu/calendar/graduation)

**PhD PROGRAM and SPECIALIZATIONS**

Although the Doctorate of Occupational Therapy (OTD) prepare students to practice occupational therapy, as a professional graduate degree, it does not prepare students for research or academic careers. Students who are interested in becoming a researcher or a faculty member prepare for these careers by completing a PhD program. At The Ohio State University, students can combine the Doctorate of Occupational Therapy program with the Health and Rehabilitation Science PhD program through entry into the OTD/PhD track. The primary goal of this dual degree program is to prepare students for academic positions in Occupational Therapy and Rehabilitation Sciences programs at research intensive universities. Therefore, in addition to the professional training, the program emphasizes higher education teaching, research, and writing grants.

Students accepted into the OTD/PhD program complete PhD courses while they are in the OTD program. By completing courses during the OTD program, the length of the PhD program can be shorter; in addition certain courses count for both degrees. Students who apply to the dual degree program are also eligible for certain University and College fellowships. Strong
applicants for this track have GRE scores at or above the 75 percentile, have a GPA at or above 3.6, may have previous research experience as an undergraduate student, and have strong interest in academia. Students who apply to the OTD/PhD program may be accepted into the OTD/PhD track or may only be accepted into the OTD program. It is anticipated that the OTD/PhD program will be 6 to 6½ years in duration, depending on progress. Students can enter the combined degree program any time in the first year. For more information, contact Dr. Amy Darragh (amy.darragh@osumc.edu).

Students who are interested may apply simultaneously apply to both the OTD and PhD programs or at any time during the OTD curriculum. Students apply to the OTD Program through OTCAS and to the PhD program through the OSU Graduate School, checking the box on the Graduate School application for OTD/PhD. This PhD application requires 3 letters of reference and a second personal statement that describes a student’s interest in a PhD degree, describes past leadership or scholarship, and explains career goals. In addition, students must request a letter of support from one of the OT faculty. It is recommended that a potential applicant meet with one of the OT faculty to discuss his or her interests and ask for the letter. The application will be reviewed by both the OT Division’s OTD admissions committee and the School's PhD admissions committee.

Additional Specializations in Occupational Therapy

Practice and/or Research Specializations are available for students to pursue over and above the occupational therapy coursework. Specializations enable students to gain additional skills in research or a clinical practice area. To enter a specialization track, students must apply and be approved by Division faculty. Students that complete the requirements will have the specialization noted on their transcript. At this time, specializations are available in research, gerontology, pediatric, rehabilitation engineering and gerontology.

Students eligible for Specializations must have a GPA of 3.5 or higher. Candidates must submit a statement of intent that explains their goals in specialization and indicates how the specialization will assist them in obtaining specific long term goals. Please see Dr. Amy Darragh (amy.darragh@osumc.edu) for additional information.

ACADEMIC STANDARDS

Students are required to abide by all policies set forth by the School of Health and Rehabilitation Sciences. Those policies can be found at: https://hrs.osu.edu/~media/Files/HRS/Academics/Academic-Resources/Student-Handbooks/HRS-Student-Handbook.pdf?la=en

Below you can additional clarification on the HRS policies that are specific to the OTD program.

POLICY 1: Code of Ethics

In addition to the HRS policy, OT student will abide by AOTA’s Code of Ethics. Violations of either Code of Ethics could include dismissal from the OT program.

POLICY 2: Academic Misconduct

This policy details the procedures for violations including but not limited to cheating, plagiarism, fabrication, aid to academic dishonesty and academic misconduct. Students will adhere to the
School of Health and Rehabilitation Sciences’ policies of academic and professional misconduct.

**POLICY 3: GPA Requirements**

Minimum GPA requirements for the OTD program follow that of the Graduate School. The Graduate School requires that student maintain a GPA of equal to or greater than 3.0.

**POLICY 4: Course Category Requirements**

All of the courses in the OTD program are considered Category 1 courses, which means that students must achieve a C- or higher before progressing through the program. Exceptions to this are extremely rare, and would require approval from the Division Director, Director of Academic Affairs, and Graduate Studies Chair.

**POLICY 5: Student Appeal Process**

The SHRS policy details appeals for reversal of a decision in regard to academic violations.

**POLICY 6: Conduct in the Classroom**

Professional behaviors are important to the success of being an occupational therapy student. Students who demonstrate consistent professional and ethical behaviors have the foundational skills to be successful in their coursework, fieldwork experiences, and ultimately, as occupational therapy professionals.

Non-academic traits, behaviors, and performance of students will be observed and described by faculty, clinical faculty, and clinical supervisors throughout the student's enrollment in the division. Areas of professional behaviors include, but are not limited to: dependability, professional presentation, initiative, empathy, cooperation, organization, clinical reasoning, supervisory process, or verbal and written communication.

**Procedures for Managing Professional Behavior Issues**

Students are expected to adhere to the Ohio State University Code of Student Conduct, and to display professional behaviors throughout their enrollment in the OTD. Professional behaviors specific to every course may be discussed at an OT faculty staff meeting. Professional behaviors, including timeliness, professional dress, professional communication, and therapeutic interactions, are essential for success in level 1 and 2 fieldworks, and are thus assessed throughout the program. Poor professional behaviors may impact a student’s ability to participate in fieldwork.

a. If a violation of the Academic Standard Conduct in the Classroom and Academic Learning Environment policy violation is suspected, the division faculty and/or Division Director will meet with the student regarding the claim of violation.

b. If the faculty determines that there is no policy violation, this meeting is used as a learning opportunity to review the policy for Conduct in the Classroom and Academic Learning Environment.

c. If the faculty determines that the behaviors violate the policy for Conduct in the Classroom and Academic Learning Environment, HRS Academic Affairs and the Graduate Studies Chair are notified and either a) a written referral to the Graduate Studies Committee is made or b) the OT Division faculty, with approval from the HRS Office of Academic Affairs, will develop a remediation plan with the student.
d. For details on potential consequences of the violation, please refer to the SHRS handbook, policy 6.

Classroom Rules

1. Respect your instructors and fellow students sitting around you.
2. Participation is encouraged in every class time.
3. Schedule your meals, snacks and restroom use around class times.
4. No side conversations are permitted during lecture.
5. Laptops and tablets may be used for class related activities during class time.
6. Different instructors may have different requirements for technology including cell phone use.

Communication with Faculty

Faculty hold office hours, either scheduled each week at consistent times or scheduled on an individual basis, to meet with students. Meeting with a faculty member in-person about a course question or about other issues is the best way to ensure accurate communication and thorough, thoughtful answers. Students can schedule an individual meeting or come to faculty offices during established office hours. Faculty phone numbers and email addresses are included in this handbook and in the course syllabi.

Communication by email is also an efficient way to communicate with faculty. It is important to note, however, that faculty will make every effort to respond within 72 hours of an email (3 business days), so if the question or issue is more pressing, it is preferable to come to office hours, even if just to schedule an individual meeting. If a faculty member has not responded within the 3 business day time limit, please consider reaching out again. Emails are sometimes quarantined or even missed, so it is important to follow up.

Attendance

Occupational Therapy Division Attendance Policy

For all Occupational Therapy courses, regular class attendance is an essential element. In addition to dissemination of information, class sessions routinely involve discussion in both large and small groups, demonstrations, clarifications, hands-on learning, labs and group-work that cannot be obtained to the same degree nor to the same quality via other formats (e.g., copying another student’s notes, downloading posted lectures). Each class also develops a type of learning community that is disrupted whenever a student’s attendance is subpar; in turn, this affects the learning of other students. Experience has also repeatedly demonstrated that students who miss class simply perform more poorly, retain less information, are less engaged, and earn lower grades.

Student vacations and other personal time should be planned during the University’s designated breaks. Fieldwork and Capstone Experience courses are the only ones that run on a different schedule, and students are notified of this schedule in advance. This attendance policy is to provide clarity and uniformity about our attendance requirements. Our Division has decided to
adopt a No-Fault attendance policy, meaning all absences will follow the below guidelines and we do not distinguish between excused and unexcused absences.

Faculty will do their best to accommodate emergency illness, family emergencies, and religious observances.

1. For all absences, the student is required to submit a Leave Request form to each faculty member whose course may be affected by an absence. *This must be done in advance of the missed class session.* One form should be completed for each episode of absence, therefore multiple courses may be listed on the same form and a copy distributed to each faculty member. In the case of illness or emergency, students must notify the instructor via email or phone as soon as is possible, preferably before the start of the class session. It is extremely important to call prior to labs if an absence is necessary. The Leave Request form must be completed upon the student's return to classes after the illness or emergency.

2. **Lab and Community Experiences:** If the absence involves a community experience or lab activity, the student may receive a zero for that activity or the loss of credit stated in the syllabus. Due to nature of lab experiences, and coordination with community partners, many of these activities are not able to be made up, and the instructor is not obligated to provide a make-up activity for student absence.

3. **Missing 0-10% of a course’s class sessions:** A students’ grade may be lowered by ½ letter grade for absences between 0-10% of the total course. The number of class sessions may differ course to course depending on the number of credit hours and how it is scheduled throughout the week.

4. **Missing 10-20% of a course’s class sessions:** At this point, a student will be required to meet with the instructor and their academic advisor to determine whether or not a professional behavior plan is required. A student’s grade will be lowered by 1 whole letter grade for the course affected. If a professional behavior plan is created, the Graduate Studies committee will also be notified of the issue and implementation of the plan.

5. **Missing 20% or greater of a course’s class sessions:** A student that has missed 20% or more of class sessions in a given course will receive a failing grade (U or E) for that course. The OT Division feels that missing more than 20% of the course constitutes “excessive nonattendance” and that the learning missed is not able to be made up at this point. This 20% standard also applies to those that have flexible attendance accommodations. In addition to the failing grade, the student must meeting with the Division Director and will be referred to the Office of Academic Affairs.

6. **Consistent tardiness** (more than 20% of classes for a course) may result in lowering the course grade by one letter grade. The student may or may not be consulted about class tardiness prior to it resulting in a lower grade for the course. PLEASE be on time. It is extremely disruptive when students wander into class late.

7. **Attendance for clinical courses:** Each clinical course (6189, 6289, 6389, 7189, 7289, 7389) has requirements for the number of hours to be completed. See individual course
syllabi and the Fieldwork and/or Capstone Experience section of this handbook for details on attendance for clinical courses.

8. Each individual instructor may require more stringent attendance in their individual courses, see each syllabus for details. No instructor may have a more flexible policy than is stated here. Students may meet with the program director for consideration of an exception for unusual or extenuating circumstances. Exceptions will only be granted on a case-by-case basis for significant events.

POLICY 7: Social Networking

Students should adhere to the SHRS Social Networking Policy. Privacy of students and clients is of the utmost consideration. This policy pertains to all students in the OTD program and any of their online personas.

POLICY 8: FERPA

POLICY 9: Religious Observation

POLICY 11: Sexual Misconduct

POLICY 19: Leave of Absence

For Policies 8, 9, 11, & 19, the OTD program and students adhere to the SHRS policies as written. The University requires sexual misconduct training for students and employees. [https://titleix.osu.edu/global-navigation/training.html](https://titleix.osu.edu/global-navigation/training.html)

POLICY 10: Clinical Practice Professional Dress

In addition to the School policies, please see OTD policies and guidelines below.

**OTD Classroom Dress is Business Casual**

Business casual is clothing that allows comfort at work, yet look neat and professional:

- Men’s Wear: Shirts with collars, nice t-shirts free of slogans, sweaters, khaki slacks, or other dress slacks
- Women’s Wear: Dresses, skirts, dress pants, khakis, dress capris that are mid-calf length and shirts (e.g. shirts with collars, t-shirts free of slogans, sweaters, dress shirts) that come to the edge of or cover the shoulders. Tunics over leggings must be mid-thigh length.
- Shoes such as flats, pumps, loafers, athletic shoes and dress sandals may be worn. Beach shoes and flip-flops are not permitted.

OTD Classroom dress is modified-Business Casual, and includes the following allowances:

1. Jeans are permitted if they are clean, without tears or holes and of appropriate length.
2. Shorts are permitted in the summer but must be at least mid-thigh length.
3. Men may wear shirts without collars providing they are clean with no holes and minimal graphics
4. Instructors may make exceptions as needed for lab classes or other occasions.
5. Spaghetti straps, tank tops, halter tops or exposed midriffs are not permitted.
6. Clothes must be properly fitting, not too small or too tight or too baggy, no skin visible when arms are raised above head or when bending over.
7. Skirt/Dress length: no shorter than 3 inches above the knee.
8. Casual attire such as stretch pants, sweatpants, T-shirts, jogging clothes, casual or sporty clothing are not permitted.
9. No hats should be worn in the classroom except for religious purposes.
10. Temperatures do fluctuate in the classroom, so layers are suggested.
11. Ohio State logo gear is always welcome.

Jewelry/Piercings/Body Art
- Jewelry must be plain and inconspicuous.
- Earrings are permitted, no more than two per ear.
- No other facial rings are permitted.
- Tattoos must be covered.

Hair & Nails
- Facial hair must be clean and well-trimmed.
- Hair and nails must be clean and well-maintained.

Fragrance
- Perfume and cologne may not be worn.
- Clothing and individuals smelling of smoke/tobacco products are prohibited.

Community/Fieldwork/Capstone Dress Code:
The Division of Occupational Therapy has adopted a professional apparel policy when working with patients/clients in a community lab, in service learning opportunities, and in fieldwork sites. An OSU occupational therapy polo shirt is required and can be purchased from the OSU Student OT Association. Solid color long casual or dress pants are required for safety, hygiene, and professional appearance reasons. Casual or sports-type shoes must be worn. Clean clothes and shoes are mandatory. No blue jeans, sandals, open toed shoes, or high heeled shoes will be allowed. All students must obtain and wear an OSU name badge. Excessive jewelry and perfumes/aftershaves are not appropriate. Students are expected to wear their OSU ID badge when at clinical sites.

Students should be aware that different fieldwork sites will have different dress standards and that they will be responsible for adjusting to these individual differences. Some sites might require students to purchase scrubs or a uniform. This will be true for Level I and Level II fieldwork experiences as well as Capstone Experience. Level I fieldwork is assigned during Year 1 and Year 2 and Level II fieldwork is assigned after completion of all course requirements. You should check with your supervisor on dress code soon after you have learned your placement.
**POLICY 20: Student Complaint**

For complaints regarding a specific course or course instructor, students should adhere to the SHRS Complaint Policy and outlined in the SHRS student handbook.

For complaints that fall outside formal grievance and appeal processes, students should adhere to the OSU OT Division Complaint Policy.

**Policy for Complaints that Fall outside Due Process**

The Division of Occupational Therapy strives to demonstrate professionalism in all its activities. In some cases, a situation may generate complaint for which no formal grievance process exists. In this case, the complaint should be described in writing and addressed as follows:

Director  
Division of Occupational Therapy  
Room 406 Atwell Hall  
453 W 10th Avenue  
Columbus, OH 43210

Please include contact information so the program director can reach you in order to resolve the complaint.

The following outlines the process for handling a complaint against the Division:

1. When possible, the Division Director will discuss the complaint directly with the party involved within 14 business days. The expectation is that the complaint can be satisfactorily resolved by this discussion. The Division Director will provide a description of the resolution in writing to the person complaining.

2. If dissatisfied with the outcome of the discussion with the Division Director, or if the complaint is against the Division Director, the complainant may submit a written complaint to the Director of the School of Health and Rehabilitation Sciences. The Division Director will provide the Director of the school with a written summary of previous discussions where appropriate. The Director will discuss the matter with each party separately and may schedule a joint appointment with the two parties in order to attempt to reach a solution. The Director will provide the person with the complaint and the division director with a written letter outlining the solution reached through this step.

3. If the complainant remains dissatisfied after step 2, the next line of complaint is to the Dean of the College of Medicine, or his/her representative.

4. If the complainant remains dissatisfied after step 3, the last line of complaint is to the Provost of the University, who serves as the chief academic officer of Ohio State.

5. Any letters or other written materials associated with the complaint from the complainant, the Division Director, Director, or Provost will be kept in a folder marked “Complaints against the Division of OT” and kept in the program director’s files for a period of 5 years.

Approved by HRS OT Faculty 4.49.2016
STANDARDS FOR CLINICAL PRACTICE:

POLICY 12: HIPAA compliance, POLICY 14 Health Insurance & POLICY 16 International Student VISA

The OTD program adheres to the SHRS policies listed above as written. HIPAA Privacy and Security, available through BuckeyeLearn, is required during the first semester (in OCCTHER 6110) and during Autumn of Year 2 (OCCTHER 7447) prior to level Two Fieldwork.

POLICY 13: Background Check

In addition to the School policies, fieldwork sites may have more stringent requirements. You are responsible for additional costs and tests as needed. Background checks are required at minimum once every 12 months. As stated in the HRS policy, if a student is involved in any situation that would affect their annual background check, the student is required to notify the division/program director within 3 days of the event.

POLICY 15: Immunizations

In addition to the School policies, you are also required to pass a physical exam at entry to the program. Fieldwork sites may have additional requirements of students. You are responsible for additional costs and documentation as needed to attend and complete all fieldwork and clinical rotations. Students may not participate in any community labs or fieldwork/Capstone Experiences until they are compliant with all immunization requirements. OSU Student Health will determine compliance and will provide compliance decisions to the Division.

POLICY 17: Drug Testing

In addition to School policies, a student may be tested at any time at the request of a fieldwork site, fieldwork educator, community partner or faculty member.

POLICY 18: Student Change in Medical Status

This policy discusses acute or chronic changes in medical status (including pregnancy). Injuries may occur both in the classroom and in the clinic. Procedures are outlined in the SHRS policy for obtaining medical care and reporting the incident to the program. The OTD program follows this policy.

Other Policies related to Clinical Experiences and Clinical Practice

On entry into the program, there are several required online courses that students are required to take. These must be completed as part of OCCTHER 6110. They are repeated again as part of OCCTHER 7447 in preparation for Level II fieldwork. This is accomplished through the BuckeyeLearn system. These courses are:

- HIPAA Privacy and Security
- Clinical Staff requirements
- Basic Requirements.
  - Basic requirements includes the following modules:
Policies related to equipment use in the lab, particularly Physical Agent Modalities, are reviewed by the course instructors in those classes. Students are expected to adhere to all safety procedures outlined by the course instructors.

Building evacuation plans are available in 406 Atwell Hall, above faculty mailboxes (BEAP) and evacuation plans are posted on every floor in Atwell Hall. In the event of fire, use the stairs. Do NOT use the elevators. If a student has a mobility impairment and cannot use the stairs, the stairwell doors are fire safety doors and the stairwell landings are considered emergency evacuation points by first responders.

RESOURCES and ORGANIZATIONS FOR STUDENTS

The OTD program adheres to the HRS Non-Discrimination Policy. Information about the University’s Office of Diversity and Inclusion may be found at https://odi.osu.edu

Students with Disabilities are served through the OSU Office of Life, Disability Services. They can be found at http://ods.osu.edu It is the student’s responsibility to contact a counselor at Disability Services to begin the process of determining eligibility for services. It is also the student’s responsibility to notify each faculty member of the need for accommodations at the start of each course.

Regulations concerning Atwell Hall usage are outlined in the HRS handbook. In addition, the lobby of the front OT office (406) is intended to be a comfortable space in which people waiting to see faculty members can sit while they wait. Please, no student loitering or eating in this lobby space. Students are encouraged to find alternative spaces or use the lab (room 416) if it is available (please see calendar on bulletin board outside of room 416 for availability).

Additional student resources are outlined in the HRS handbook.

Student Occupational Therapy Association (SOTA)

Any student enrolled in the program is eligible for membership in the Student Occupational Therapy Association (SOTA) and the faculty members encourage you to join. The purpose of the organization is to promote interest in the profession with specific aims toward service and fellowship for the social, intellectual and professional benefits of each member.

SOTA also has a liaison with the Ohio Occupational Therapy Association, providing professional opportunities for SOTA members. SOTA meetings are held a minimum of three times per academic year and notices of meetings are made available to all SOTA members and OTD students. Annual dues for the Association are prescribed and are minimal. SOTA has a separate handbook of their policies and procedures.
Pi Theta Epsilon

Pi Theta Epsilon is a national honorary society of occupational therapy. The chapter of PTE at The Ohio State University is the Lambda Chapter and is recognized by the Association of College Honor Societies. Membership in The Ohio State University Lambda Chapter is offered at the end of the 3rd semester of occupational therapy classes. Students eligible to receive applications must have a 3.5 GPA and be in the top 35% of the class. The mission of Pi Theta Epsilon is to promote research and scholarship among occupational therapy students.

Columbus District, Ohio Occupational Therapy Association

Liaison with the Columbus District of OOTA is the local district for the state association. The state association provides information about OT services to consumers. The association also advocates and provides continuing education opportunities for occupational therapy practitioners. The Columbus District meetings are held monthly. All students are welcome to attend these meetings. Announcement of meetings is posted on the student bulletin board inside room 416. Membership is available when you are enrolled in the OSU OTD program and dues are $15.00 for one year. Additional information is available at www.oota.org.

American Occupational Therapy Association (AOTA)

Student membership in the American Occupational Therapy Association is available in December of each year. An annual student fee of $75.00 includes receipt of the American Journal of Occupational Therapy (AJOT) and OT Practice magazine from the national office. Additional information is available at www.aota.org. The Division pays for your membership for two years using the program fee.

AOTA Mission Statement: The American Occupational Therapy Association advances the quality, availability, use, and support of occupational therapy through standard setting, advocacy, education, and research on behalf of its members and the public.

World Federation of Occupational Therapy (WFOT)

The World Federation of Occupational Therapy directly links 73 member organization around the world, with an individual membership of more than 25,000 and a national organization membership that represents over 350,000 occupational therapists internationally. See http://www.wfot.org/. WFOT promotes occupational therapy as an art and science internationally. The federation supports the development, use and practice of occupational therapy worldwide, demonstrating its relevance and contribution to society.
OCCUPATIONAL THERAPY FIELDWORK & CAPSTONE EXPERIENCE

You will enroll in and complete Fieldwork Level I (OT 6189: Mental Health; OT 6289: Physical Function; OT 6389: Pediatrics), and Fieldwork Level II (OT 7189) and Capstone Experience (OT 7389). The policy and rules for clinical experiences are defined below:

Throughout a student’s three years, they will have six different clinical experiences as well as a multitude of simulation and community-based experiences.

Overview of Course Policies:

1. Level I rotations (6189, 6289, 6389)
   a. Students must receive a passing grade for each of the Level I rotations before progressing to the next.
   b. Grades are Satisfactory/Unsatisfactory, as outlined in the syllabi.
   c. To receive Satisfactory grade, the student must complete all assignments and reflections outlined on the syllabus, AND received a passing score on the evaluation completed by the fieldwork educator. Refer to syllabus for details and specifics on assignments as well as the current evaluation tool.
   d. The AFWC or instructor of the course makes final determination as to the grade the student receives.

2. Level II rotations (7189)
   a. Course is graded Satisfactory/Unsatisfactory
   b. Students must pass this course two times in order to progress through the curriculum, equaling a total of 24 weeks full time in Level II rotations.
   c. Students must complete Level II fieldwork in two practice settings. This may occur at one larger institution, but must be two distinct areas of practice.
   d. To receive a passing grade, students must complete all assignments as outlined on the syllabus, including receiving a passing grade on AOTA’s Fieldwork Performance Evaluation (FWPE) as completed by their fieldwork educator.
   e. The AFWC or instructor of the course makes final determination as to the grade the student receives, with heavy reliance on the score on the FWPE.
   f. No part of Level I hours may be substituted for Level II fieldwork
   g. It is possible to complete Level II fieldwork on a part time basis, extending the number of weeks to match the percentage of FTE, which can be no less than .5. This option would delay graduation due to the curriculum design, and it may take time to find a site that can provide this option.

3. Capstone Experience (7389)
   a. Course is graded Satisfactory/Unsatisfactory.
   b. Students must pass all of the individualized objectives that were created in collaboration with the faculty advisor and site mentor AND complete all assignments/reflections outlined in the course syllabus.
   c. The Capstone Coordinator/course instructor makes the final determination as to the grade the student receives, with heavy reliance on the scores of the individualized objectives.
   d. No part of Level I or Level II hours may be substituted for this experience.
e. It is possible to complete this experience part time, yet no less than .5 FTE. This would delay graduation due curriculum design. It may take time to find a site that can accommodate this option.

Outline of Responsibilities

**Level II Fieldwork**

1) Academic Fieldwork Coordinator (AFWC) is Responsible for:
   a) Assigning all eligible students to fieldwork experience and confirming the assignment in writing to each fieldwork supervisor
   b) Assuring that all written contracts and letters of agreement between the educational institution and fieldwork facility are signed, and periodically reviewed.
   c) Making regular and periodic contacts with each fieldwork facility in which students are placed.
   d) Maintaining a current file of information on each fieldwork facility for student and faculty reference.
   e) Identifying new sites for fieldwork experience.
   f) Developing and implementing a process for withdrawal of students from a fieldwork experience.
   g) Orienting students to the general purposes of fieldwork experiences and providing them with needed forms.
   h) Reassigning students who do not complete original fieldwork assignments in accordance with education program policies.
   i) Developing fieldwork experience programs that provide best opportunities for the practical implementation of theoretical concepts offered as part of the didactic curriculum.
   j) Maintaining a collaborative relationship with fieldwork facilities
   k) Sending necessary information and forms for each student to the fieldwork supervisor unless responsibility is assigned to the student.

2) Fieldwork Educator (FWE) is Responsible for:
   a) Collaborating with the Academic Fieldwork Coordinator in the development of the fieldwork program that provides best opportunities for the practical implementation of theoretical concepts offered as part of the academic educational program.
   b) Preparing, keeping current and sending to Academic Fieldwork Coordinator information about the facility, including a statement of the conceptual models from which evaluation is derived, and upon which treatment is based.
   c) Scheduling students in collaboration with Academic Fieldwork Coordinator.
   d) Evaluating each student at the midpoint and termination of the fieldwork experience using AOTA’s Fieldwork Performance Evaluation. This is done electronically through OSU’s database.
   e) Being familiar with the process of withdrawal of students from fieldwork experience of each academic educational program from which students are accepted.
   f) Notifying the Academic Fieldwork Coordinator of any student whom the fieldwork facility is requesting withdrawal.
   g) Reviewing periodically the contractual agreement between the academic educational program and the fieldwork facility, assuring that these agreements are signed.
   h) Providing regular and periodic supervision of students.
3) Student is Responsible for:
   a) Confirm fieldwork placement via written communication with the fieldwork site contact 6-8 weeks ahead of the placement start date. Student must provide name, and contact information of site’s assigned fieldwork educator to the AFWC prior to the start of their rotation.
   b) Obeying all policies and procedures of the fieldwork site/facility unless exempted, including prompt notification of student absences.
   c) Obeying all policies and procedures of the School of Health and Rehab Sciences and the Division of Occupational Therapy while enrolled in OCCTHER 7189, a University course.
   d) Fulfilling all duties and assignments made by the fieldwork educator, unless exempted, within the time limit specified.
   e) Being informed as to the policy of the academic educational program in which they are enrolled regarding "make-up time" for absences during fieldwork experience, and adhering to these policies.
   f) Writing a letter of appreciation to the Director of the Occupational Therapy Department and the facility Administrator for the educational opportunities offered to the student at the conclusion of the rotation.
   g) Completing all other assignments in the Carmen course for OCCTHER 7189 as assigned. These may include weekly discussions, evidence-based projects, midterm and final surveys and updating site specific forms.

**Capstone Experience**

- **Capstone Experience Faculty Mentor is Responsible for:**
  a) Advising the student on possible practice settings for the Capstone Experience.
  b) Mentoring and orienting students to the general purposes of the Capstone Experience and providing them with needed forms.
  c) Mentoring the student in reviewing evidence, assessments, and treatments relevant to the selected Capstone Experience area.

- **The Director of Clinical and Experiential Education is Responsible for:**
  a) Assuring that there is a signed contract in place for the practice site the student is interested in completing their Capstone experience.
  b) Developing and implementing a process for the withdrawal of students from a Capstone experience.
  c) Reassigning students who are not successful in the doctoral experience in accordance with education program policies.
  d) Identifying an on-site mentor who will supervise the student on-site.
  e) Providing training on supervision and the Division of Occupational Therapy’s expectations for mentors.
  f) Making regular and periodic contacts with the facility in which students are placed.
  g) Maintaining a collaborative relationship with doctoral sites.

- **Site Mentor is Responsible for:**
  a) Collaborating with the student and faculty mentor in the development of the Capstone Experience learning objectives that provides opportunities for the
practical implementation of theoretical concepts offered previously in didactic and doctoral settings.

b) Scheduling students in collaboration with Ohio State University faculty.

c) Evaluating each student at the midpoint and conclusion of the Capstone Experience using the specific learning objectives that were created prior to the doctoral student’s start.

d) Working with the student and Ohio State University faculty member if problems arise during the Capstone Experience.

e) Being familiar with the processes regarding the withdrawal of students from Capstone Experience for The Ohio State University.

f) Reviewing periodically the contractual agreement between the academic educational program and the facility, assuring that these agreements are signed and current during the time the student is present.

g) Providing regular and periodic supervision of students.

h) Verifying the hours the student completed.

- Student is Responsible for:
  a) Working collaboratively with the site and faculty mentor to create specific learning objectives for the Capstone Experience.
  b) Obeying all policies and procedures of the facility unless exempted, including prompt notification of student absences.
  c) Fulfilling all duties and assignments made by the doctoral supervisor, unless exempted, within the time limit specified.
  d) Completing 560 hours (14 weeks full-time) of Capstone Experience, at least 80% of which (448 hours) must be completed at the Capstone Experience site. Absences must be made up to ensure 560 hours of Capstone Experience.
  e) Evaluating the Capstone Experience supervisor and site to help continue to improve educational outcomes.
  f) Writing a letter of appreciation to the site supervisor and the facility Administrator for the educational opportunities offered to the student.

- Division of Occupational Therapy Faculty is Responsible for:
  a) Determining the expertise of the site mentor through review of CV/resume, supporting documents (e.g. certifications, specializations), or completion of in-depth interview.
  b) Determining if the site mentor is qualified to serve as site mentors for the Capstone Experience by majority vote of the core OTD faculty members. This ensures that the student is mentored by an individual with expertise consistent with the student’s area of focus. This individual may or may not be an occupational therapist. (C 2.4)

Evaluations

- Level I Fieldwork

  1. Your FWEd will complete the Level I Evaluation of Professionalism by the end of
your 40 hours, via Exxat. The focus of this evaluation is on development of professional behaviors needed to be a solid clinician. Students must receive an overall grade of ‘M’ or Meets Expectations on this evaluation. Any items that receive an ‘N’ or Needs Improvement will be reviewed together by the student and the AFWC/course instructor to determine whether or not focused learning needs to happen to further develop that area before Level II fieldwork. You may have a copy of your evaluation. Obtaining it is your responsibility. They are all stored in Exxat so that we may view them centrally.

2. Students will complete an evaluation of the fieldwork experience via Exxat. Please be sure to print a copy to share with your educator on your last day. These are essential to helping us determine which sites to continue to use, and which may be ready to develop into a Level II or Capstone Experience site.

➤ Level II Fieldwork

1. You will have the opportunity to let us know how things are going at midterm.

2. Your FWEd will also complete the Fieldwork Performance Evaluation (FWPE) to review your progress. This is usually done at the six to eight week point in the fieldwork experience. The midterm evaluation is to identify strengths and weaknesses in the student's performance. Any modification in performance that is necessary for successful completion of the assignment will be identified. The Fieldwork Performance Evaluation (FWPE) form may be used as a basis for discussion of performance at any time during the assignment. You may have a copy of your evaluation. Obtaining it is your responsibility. They are all stored in Exxat so that we may view them from here as well.

3. A faculty member from the fieldwork office will complete either a phone call or in person visit as a midterm visit between weeks 6-9 of each rotation.

4. Final: To receive a satisfactory grade, in addition to completion of other assignment as specified in Carmen and on the syllabus, students must achieve the overall final score of 122 points printed on page two of AOTA’s Fieldwork Performance Evaluation (FWPE). In addition to an overall score of 122 on the FWPE, students must receive at least a score of three on the first three items on the FWPE that relate to Safety and Ethics. Students who do not receive at least a three on these three items will receive an unsatisfactory final grade. You may have a copy of your evaluation. Obtaining it is your responsibility. They are all stored in Exxat so that we may view them from here as well.

5. A copy of the Fieldwork Performance Evaluation can be found on Carmen. As you begin your fieldwork, you should read it and become familiar with the performance expectations.

6. Two weeks before the end of your fieldwork you will have access to the Student Evaluation of the Fieldwork Experience (SEFWE). Complete this in Exxat and share it with your fieldwork educator. Be candid and honest. You need to be thoughtful and give information as to how a situation facilitated, or failed to facilitate, your learning. Give comments about both helpful and less helpful
experiences. Be realistic and professional in your feedback about both the site and the educator. This information will be shared with future students to help them make decisions on sites and to be successful.

7. You will also complete a Final Survey which gives us information about how prepared you were for this specific fieldwork or doctoral site, and which courses were most relevant. We use this for program evaluation.

8. **There will always be a fieldwork/clinical faculty member available for virtual office hours from 8:30-9:30 pm EST Sunday-Thursday throughout each Level II rotation and Capstone Experience.** Texts can be sent at any time to set up a call outside the regular office hours. Email will be reviewed daily and responded to within 48 hours. See syllabus for phone numbers.

- **Capstone Experience**

1. The Ohio State University has established 5 behavioral objectives for the Capstone Experience, in agreement with the curricular threads and program outcomes. In addition, in collaboration with their site mentor, the OTD students will set 3 individualized learning goals to customize the concentration of the experience to the learning needs of the OTD student. The Capstone Experience student, site mentor, and Capstone Coordinator should agree upon these three student specific objectives and individualize the five OSU OTD standard learning objectives. Objectives will be reviewed and finalized with the site mentor before the start of the experience.

2. Evaluation of the individualized objectives occurs under the supervision of a site mentor with expertise in the student’s chosen area. Evaluation of performance is completed via the OSU OTD Capstone Experiential Evaluation at midterm (~7 weeks) of the 14-week Capstone Experience. Note that there is space provided for both the doctoral student and the site mentor to add his/her own objectives. The OTD student and site mentor will revisit the established learning goals at midterm and at final. An email check-in will occur at week 7.

3. The student must successfully meet or exceed their individualized objectives to successfully complete the Capstone Experience. The Evaluation has three measures for each objective: 1. Accomplished 2. Making Progress 3. Not Progressing, needs attention. Students must accomplish each objective to receive a ‘satisfactory’ grade for their Capstone Experience courses. If at midterm the student and site mentor supervisor, faculty advisor and student are concerned that the objectives may not be met due to unforeseen circumstances, the Director of Experiential Education will be consulted to see if it would be appropriate to modify the stated objectives.

4. Two weeks before the end of your Capstone Experience, you will have access to the Student Evaluation of Capstone Experience form in Exxat. Complete this information and share it with your site mentor. Be candid, honest and professional.
5. You will also complete one more Final Survey which gives us information about how prepared you were for this specific fieldwork or doctoral site, and which courses were most relevant. We use this for program evaluation.

Grades

Grades for fieldwork and Capstone Experience are determined by the Division of Occupational Therapy, The Ohio State University, not by the fieldwork educator. The report of performance by the fieldwork educator or site mentor will be the main factor in the determination of the grade. You must participate in and complete all OSU course assignments (Carmen postings and online submissions) in order to receive a passing grade. YOUR GRADE WILL NOT BE POSTED UNTIL YOU COMPLETE ALL NECESSARY OSU COURSE ASSIGNMENTS WHICH INCLUDES BOTH DOCUMENTS YOU MUST SUBMIT AND PARTICIPATION IN CARMEN DISCUSSIONS.

Fieldwork Level II

Fieldwork is graded satisfactory or unsatisfactory (S-U). Because the fieldwork schedule does not match the University calendar, your grade may initially show an incomplete or missing grade. To receive a Satisfactory grade (S), students must achieve the overall final score of 122 points printed on the AOTA Fieldwork Performance Evaluation (FWPE). In addition to an overall score of 122 on the FWPE, students must receive at least a score of three on the first three items on the FWPE that relate to Safety and Ethics. Students who do not receive at least a three on these three items and/or do not have an overall score of at least 122, will receive an Unsatisfactory (U) final grade. Students who receive a failing grade on the FWPE, who withdraw at any time during the placement, and/or whose supervisor requests termination of the placement will receive an Unsatisfactory grade (U). Occasionally a student may choose to withdraw from their rotation. Students in this situation will need to meet with the AFWC to determine whether or not the use of a Withdrawal (W) grade is an option through the Registrar’s office.

Students who receive a U (unsatisfactory) grade will be required to complete remediation and petition the faculty before another fieldwork placement will be initiated. This may include additional academic work, additional field experiences, and a learning contract at the discretion of the Occupational Therapy Division Director with input from the Academic Fieldwork Coordinator and faculty. This may necessitate a delay in the start of the next fieldwork experience until the remediation plan is completed. The intent of the remediation plan is to allow the student to develop the skills necessary to be successful on the next fieldwork experience.

Students who receive Unsatisfactory grades in two placements will be referred to the Division Director for review and then to the Executive Committee for the School of Health and Rehabilitation Sciences for possible dismissal from the Occupational Therapy program.

A student who does not complete and pass the two full time fieldwork placements, will not be eligible to take the NBCOT Certification Examination and will not be able to practice as an Occupational Therapist.

A student must successfully complete 24 weeks of Level II fieldwork in two distinct practice settings.
Occasionally, a student may have difficulties on fieldwork. Patient care is of primary concern and the school will intervene if problems arise. Each case will be dealt with on an individual basis and follow procedure. The purpose of this policy is to outline a sequential procedure for instructional and/or disciplinary interventions in the event of unsatisfactory student performance during fieldwork placements. The intent is to encourage early intervention with an emphasis on collaborative problem solving in order to assure successful student fieldwork performance. The procedure usually begins in sequence, but may vary depending upon the nature of the unsatisfactory performance.

1. The fieldwork educator (FWE) reports unsatisfactory performance to the student and Academic Fieldwork Coordinator (AFWC) upon identification. The FWE and AFWC counsel the student on corrective actions. A Learning Contract is established.

2. The Learning Contract will be developed jointly by the student, the Fieldwork Educator and the AFWC. The learning contract will include, but is not limited to: a description of the problem; suggested learning strategies; outcome measures; time lines; and consequences of success or failure to meet requirements set forth in the plan. The fieldwork educator (FWE) monitors student progress and provides formal (written) and informal feedback to the student and AFWC for the duration of the placement, at intervals established in the learning contract. If the learning contract fails for any reason, the Academic Fieldwork Coordinator (AFWC) and Division Chair will discuss the issues, implement a plan, and decide the outcome.

3. Continued unsatisfactory performance will result in a ‘U’ (Unsatisfactory) grade for that fieldwork placement. Immediate removal (prior to the scheduled ending date) from the site and a failing grade may be given for any fieldwork placement for the following.
   a. Violation of patients’ rights
   b. Violation of the rights of others
   c. Violation of the AOTA Code of Ethics
   d. Unprofessional behavior
   e. Unsafe practice
   f. Substance abuse
   g. Failure to complete any of the specified requirements
   h. Continued unsatisfactory performance
   i. Request by the fieldwork site that the placement be discontinued due to student performance.
   j. A score below a “3” on items 1 – 3 of Section 1, Fundamentals of Practice, on the Fieldwork Performance Evaluation (FWPE).

Documentation of the issues, learning contract/plan of action, goals, and evaluative tools are part of the academic record. Information about a student’s academic record may not be shared with anyone outside of the academic institution without the student’s permission.

Some students who have persistent professional behavior or academic difficulties during their academic program may work with the AFWC to develop a learning contract before or during fieldwork to help the student have accountability.

Capstone Experience

Withdrawals (either by the OTD student or by the Director of Experiential Education) from the Capstone Experience will result in the OTD student and the OTD Experiential Director and/or Division Director developing an individualized plan to complete the Capstone Experience.
Component. This plan, and all steps of the plan, must be completed prior to completion of the program. Withdrawals from an OTD Capstone Experience will be considered “Unsatisfactory” except by decision of the Director of Experiential Education in consultation with the Director of the Program.

Students who fail the Capstone Experience (a failing/non passing grade at the final or termination by the site due to failing performance) will be required to go through a remediation process before they could begin a second Capstone Experience. This remediation will be directed by the Director of Clinical and Experiential Education and will focus on areas the student, site mentor, and faculty advisor identified as weaknesses during the first Capstone Experience. After a plan of remediation has been successfully completed and with the permission of the Division Director, the student will re-register for OT 7389 and must complete 14 weeks of the Capstone Experience. The dates and location of the new Capstone Experience are dependent on the availability of placement sites, potential Site Mentors and match of student’s needs.

Students who receive unsatisfactory grades in two Capstone Experience Placements will be referred to the Executive Committee for the School of Health and Rehabilitation Sciences for dismissal from the Occupational Therapy program. A student who does not satisfactorily complete OT 7389 will not earn a degree in Occupational Therapy and will not be eligible to take the NBCOT Certification Examination and will not be able to practice as an Occupational Therapist.

**Placements**

It is not possible for students to experience every one of the eighteen identified settings in which occupational therapists practice. Once students enter the program, all clinical experiences will be coordinated by faculty. Students are not permitted to contact sites with whom we already have a contract for additional shadowing experiences, or to request a certain site accept them as a student without the permission of the AFWC. Once the student has spoken with the AFWC, there is a document that can guide a student through the process of independently searching for a fieldwork site. We are interested in sites that want to have an ongoing relationship with the Occupational Therapy Division at The Ohio State University. The faculty work hard to ensure that the sites we use have a structured student program for optimal learning, and that the site is compatible with our curriculum.

Students will have the option to complete all three Level I rotations in the Greater Columbus area. Students may be placed up to 45-60 minutes from campus for Level I rotations, therefore it is suggested that students discuss transportation limitations with the AFWC. Placements for all three Level I rotations are determined by the AFWC, with student input considered. Students may volunteer to complete the Level I Mental Health rotation during spring break of the first year, both in and out of the Columbus area.

Fieldwork Level II placements are determined by the Academic Fieldwork Coordinator during summer semester of the second year. The process is student-centered and consists of matching skills and interests of the students with the characteristics of the sites available for Level II Fieldwork in the following calendar year. This process will be initiated during OT 7440, Fieldwork Preparation I, during spring semester of the first year of the program. Fieldwork placements are scheduled in those facilities with which the Division has educational affiliation agreements. There will be a list of spaces reserved for OSU students for each semester.
Fieldwork is set by the Academic Fieldwork Coordinator in coordination with fieldwork sites, with consideration of student input. Each fieldwork assignment is 12 weeks in length. Once placements are set, they are considered final. Should a student decline or withdraw from the placement they are assigned, the student’s progression through the program is at risk of being delayed.

Students may not complete any part of Level II fieldwork at a place where they have been or are currently employed. Students must disclose all relationships to employees at any potential Level II fieldwork site. These will be considered on a case by case basis.

Some things to help in planning for Fieldwork II:

- You may or may not be in Columbus--consider this when signing leases.
- You should not make personal plans that are dependent upon your being in any one city for both placements.

The decision about where you will go for your fieldwork will be made by the AFWC. The process for making this decision is a collaborative one and is outlined below.

a. The AFWC will meet with the entire class and briefly describe the places that are available.
b. The students will spend time reviewing the information available about the sites and make 3-4 choices for placement for each fieldwork rotation. You may wish to talk with the AFWC during this time to get ideas about what is available at various facilities or to ask any questions that you have.
c. You must make an appointment with the AFWC to submit choices and clarify any points as necessary. She will check that she understands your priorities.
d. Students will be placed in two distinct settings, per ACOTE guidelines. These may include but are not limited to: Inpatient Acute Care, Inpatient Rehabilitation, Mental Health, Pediatrics (Schools, Outpatient or Hospital), Outpatient Adult, Skilled Nursing Facility, and Community-Based Practice.
e. Fieldwork is becoming more competitive. Students who wish to have very specific types of fieldwork may be delaying progression through the program by a semester to get their desired type of fieldwork site.
f. The AFWC will make fieldwork placement decisions. Students may be placed at any of the facilities that have agreed to host an OSU students, therefore students may need to relocate for a short time period. Once placement decisions are made, placements are final. Should a student wish to change or decline a placement, the student may risk delay in graduation due to lack of availability of another suitable (matching OSU OT curriculum) fieldwork placement. There is no guarantee that any specific setting or location will be available to students.
g. In general, students will be able to have one placement within a 45-60 mile radius of the OSU campus, and one placement outside this radius. Exceptions may be made on an individual basis for special circumstances. These circumstances must be discussed during your individual meeting with the AFWC and will be reviewed by the Faculty.

Capstone Experience

In collaboration with the Director of Clinical and Experiential Education and the Capstone Coordinator, the OTD students will complete a Capstone Experience Preliminary Planning Form demonstrating their interest and desired focus of the prospective Capstone Experience.
Assignment of all Capstone Experience sites is competitive and subject to availability. In many cases, the Capstone Experience will require the student to commute a distance or relocate. All Capstone Experience sites must have a signed affiliation agreement with The Ohio State University Division of Occupational Therapy and have a site mentor who is able to offer content expertise to help the student meet the goals of his/her Capstone Experience. The Division Faculty reviews and determines if the site mentor meets the standards required to be a site mentor. Similar to fieldwork sites, Capstone Experience sites will receive the orientation to the curriculum, goals, and objectives of the Ohio State Division of Occupational Therapy (C.2.2).

Once Capstone Experience placements are made, they are final. Should a student decide to decline the placement offered, they risk delay of their graduation date. Students may not complete any part of the Capstone Experience at place where they are currently employed. Past positions will be considered on a case by case basis. All relationships to employees at the Capstone site must be disclosed to the school prior to placement. The only exception to this rule is the LEND trainee, awarded through competitive application, or any other faculty awarded Graduate Research Assistantship for work on research. The work responsibilities must be tied to the learning objectives, and learning objectives over and above work responsibilities must also be outlined.

Fieldwork Sites without staff Occupational Therapists.

In the event a student is interested in completing their Level II fieldwork at a site that does not have an available fieldwork educator that is an occupational therapist, the following procedure will be followed.

1) Identify a person at the site that is willing to serve as the student’s daily supervisor/educator.
2) Identify an occupational therapist, either a faculty or community member OTR/L that is willing to serve as fieldwork educator for the student at the site. This individual must have the equivalent of at least 3 years of full time professional experience.
3) Collaborate with all three parties to determine schedule and supervision that at a minimum has direct supervision for 8 hours a week by the OTR/L. The supervising OTR/L must also agree to be available via phone, email and/or text during all working hours in order to ensure adequate supervision. The non-OT supervisor and OT supervisor must also discuss student progress at least weekly.
4) State licensure law will be followed in regards to determining scope of practice.
5) The supervision plan will be documented and signed by all parties before the rotation begins.

International Fieldwork & Capstone Experiences

Students may participate in international fieldwork or capstone but should be aware that these experiences must be arranged far in advance and may be cancelled for various reasons. Students may only enter countries for fieldwork with the approval the OSU Study Abroad office. https://oia.osu.edu/getting-started.html The student must follow all OIA policies, including health and transportation insurance. The Division of Occupational Therapy must be able to agree to a contract with the setting in which the student is interested in participating. For a Level II experience, the occupational therapist must be a graduate of a World Federation of Occupational Therapy recognized university. Language proficiency must be proven if the country is the primary language is not English.

Preparing for Your Fieldwork or Capstone Experience
Forms

1. Complete an electronic copy of the Personal Data Sheet. This will be completed in Exxat via completion of the Student Profile. Students will then be able to send their completed profiles to each of their sites.

2. Nothing has been told to fieldwork educators or sites about you as individuals without your permission. It is your responsibility to inform the fieldwork educator or doctoral site mentor of any condition you have that could interfere with client care in any way. Practitioners cannot carry out their responsibilities for client safety and care without full knowledge of any limitations you may have. Accommodations must be made through the Office of Disability Services and agreed to by the site before you begin your placement. The AFWC will assist in the communications regarding accommodations between student and site as needed.

3. While not a complete list, here are some of the conditions you should inform your educator about--some affect your safety, some affect client safety, and some affect the supervisory responsibilities of your fieldwork educator. If you have questions about a specific condition, please make an appointment with the Offices of Disability Services (www.slds.osu.edu).
   - Seizure problems
   - Pregnancy
   - Hearing loss
   - Decreased vision
   - Restrictions of mobility
   - Restrictions of ability to lift objects or persons
   - Learning Disabilities

4. Update your resume. Provide an electronic copy to the AFWC which will be sent to your sites. This is usually done during the FW Prep course, OT7440. It is the student’s responsibility to keep it updated and inform the AFWC if a new version exists.

5. Ensure you can login to and understand how to use Exxat, the fieldwork database management system. Evaluations are completed in Exxat.

Liability Insurance

1. You have each paid for liability insurance through student fees. Some sites will require that you provide proof of insurance either before you begin or on your first day of fieldwork or Capstone Experience. Please email the fieldwork office and someone will pass the certificate of insurance along to the clinical site student coordinator.

Health Insurance

1. **You are required to maintain health care insurance during Fieldwork and Capstone Experience.** You may have to go through personnel department procedures at the center to which you are assigned. This may include some kind of physical exam. If there are times when you need health care, it is your responsibility to seek a physician. This is your responsibility, not the facilities’.

2. You must be prepared to provide evidence of health insurance to the facility. Have your insurance number available.
3. If an injury/incident happens on site, follow all the site’s procedures for reporting the incident. Remember that you are a student, not an employee, therefore you are responsible for seeking and paying for care received. This is one of the reasons why you are required to carry health insurance. Once you have completed any reporting with your fieldwork site, you must notify the AFWC of the incident within 24 hours. This is also outlined in the SHRS Handbook.

4. If you have a change in medical status at any time during didactic or fieldwork portions of your curriculum, specifically one that requires you to be away from fieldwork or Capstone Experience for more than three consecutive days, you will be required to obtain medical clearance to resume or begin coursework. You must notify the AFWC and provide documentation to resume. This policy is also outlined in the SHRS handbook.

5. If you need to call off sick to your center, you must notify the AFWC in writing that day. This time may be required to be made up depending on the policy of the center and in consultation with your FW educator or DEC site mentor.

**Health Review**

1. The School of Health and Rehabilitation Sciences requires a health review of all students. Records of compliance with this requirement are kept at the Student Health Center (not in the School). Many of the facilities where you do fieldwork or Capstone Experience have made health review, including flu shots, mandatory. In order to make certain that this requirement is being met, there is a statement in the contracts that we have with the centers that says the School will assure that all students have a health review. You are responsible to ensure that you have your immunizations up to date for the fieldwork site. To prevent cancellation of your fieldwork or Capstone Experience, you need to be certain that your records in the Student Health Center are complete.

2. You are responsible for providing copies of any health requirements to your fieldwork or doctoral site. Throughout your education, we have ensured that you have been keeping up with these requirements, however it is your responsibility to provide copies of these documents to your site upon request. MyBuckMD is available as well as Exxat for printing these at your convenience.

**Criminal Background Check**

An updated criminal background check will be required for all students annually. If you have an incident that would change what shows upon your background check, according to the School of Health and Rehab Sciences Handbook, you have three days to disclose this information to the School and/or the AFWC.

**Note:** If the background check reveals a positive history of any type, it will be reviewed by the Academic Fieldwork Coordinator and Division Director. The student will be advised as to the potential consequences, based on the nature of the offense. Consequences can include difficulty in obtaining clinical placement and/or potential dismissal from the program. It will be the student’s responsibility to review a positive history with potential fieldwork sites and obtain clearance for placement. Students who are rejected by a clinical site on the basis of criminal
background check results will not be guaranteed an alternate placement. If The OSU Wexner Medical Center decides that you are not eligible to maintain an identification badge due to the nature of the offense you committed, you will be reported to the executive committee for the School of Health and Rehabilitation Sciences for dismissal from the Occupational Therapy program.

Students should be aware that they may be required to do a new background check for each Level II or DEC site, and that, with rare exception, checks are done at the student's expense.

Financial Aid

1. The Division and/or AFWC do not comment on any financial aid issues, but will be happy to fill out any forms that you might require.
2. During the semesters on fieldwork and Capstone Experience, you will be enrolled in 9 hours of coursework. Check to be sure this will not affect the status of your loans or grants.
3. You may need to work with the Ohio State University Financial Aid Office. It is best to take care of these things before fieldwork or Capstone Experience when you have time during business hours of the offices.

Scheduling

1. You will be able to schedule both spring and summer semesters of 7189 via BuckeyeLink before you leave campus. You will be able to view your account any time after you register. You will be charged late fees if tuition is not paid one week prior to the first day of the semester. The Dates of Fieldwork and Capstone Experience do not match the semester schedule.

Affiliation Agreement

1. The Ohio State University signs an Affiliation Agreement with each center that accepts OSU students.
2. You are responsible for the information contained in the agreement or contract. It is very important that if you have any questions, you ask them of the AFWC!

Documents and Useful Resources to Take

- School of Health and Rehabilitation Sciences Handbook is online. It may have answers to some questions that come up. [https://hrs.osu.edu/-/media/files hrs/academics/academic-resources/student-handbooks/hrs-student-handbook.pdf?la=en&hash=08130BBA392849D9947FD8210CB94C458D400FCE](https://hrs.osu.edu/-/media/files hrs/academics/academic-resources/student-handbooks/hrs-student-handbook.pdf?la=en&hash=08130BBA392849D9947FD8210CB94C458D400FCE)
- Liability insurance policy-ask AFWC
- HIPAA testing proof (BuckeyeLearn)
- Your health review including Hepatitis B vaccination
- Health insurance verification
- CPR certificate (Basic Life Support -- infant and adult)
- Social Security card and picture identification
- Personal computing device and OSU login for library access, including internet access
- Occupational Therapy textbooks related to practice
In addition, ask your particular site what they recommend. Gain access to the local library for assignment resources.

**While you are on Fieldwork or Capstone Experience**

*Reporting for Work*

1. Always be sure to arrive at your Fieldwork or Capstone Experience center appearing ready to learn and work. **This includes being on time, not a day late.** You, and the University, have responsibilities to the center in terms of the time of your assignment.

*Uniforms*

1. You are to dress as required by the site to which you are assigned. You may wear your OSU OT approved apparel until you know what the facility requires of you. See section on Dress Code.
2. Be sure you have comfortable shoes, and most importantly a watch. Some sites do not allow you to carry a cell phone, and you often need to time yourself in and out of a treatment session.
**Absence**

- **Level II Fieldwork**

  Fieldwork in Occupational Therapy (OT 7189) carries 9 hours of University credit, and the expectation is that you will work full time for twelve weeks with your supervisor. Your schedule will be set by your fieldwork setting, which might include weekends, or alternative schedules. In the Occupational Therapy Division we evaluate any situation in which there are more than 3 days of absence in a course carrying this amount of credit. This would mean 24 hours during an affiliation. Any absence beyond this amount would require evaluation by the center and University faculty in terms of reason for the absence in relation to performance by the student. **This should not be considered time off that the student is entitled to have.** It is time that may be used to cover illness, holidays or emergencies should any occur during the fieldwork period (not weddings or vacations). **Fieldwork sites may have their own policies and may require that you make up any time off.** If you have a non-emergent situation, excused absences are at the discretion of the center and your supervisor may decide not to give you the time off. **Days off past these three must be made up.** The AFWC must be notified of any absences in writing the day they occur.

  One of the objectives of fieldwork is to develop professional behavior. Stating a policy regarding absence should not be viewed as interference in this process but rather as a guideline to follow in the process as related to the supervisor-supervisee relationship.

- **Capstone Experience**

  The Capstone Experience carries 3 hours (OT 7289 Autumn) and 8 hours (OT 7389 Spring) of University credit. At least 80% of your hours must be on location at your Capstone Experience site. Your schedule will be set by your Capstone Experience site, which might include weekends, or four ten-hour days. Any absence you have must be made up so that you reach 640 hours of time, with a duration of at least 16 weeks. You will track your time electronically.

  One of the objectives of the Capstone Experience is to develop professional behavior. Stating a policy regarding absence should not be viewed as interference in this process but rather as a guideline to follow in the process as related to the mentor-mentee relationship.

**Holidays**

Holidays which occur during fieldwork are granted **in accordance with the policies of the fieldwork or Capstone Experience facility;** not the University. Do not make any plans that would require you to have a day off. Treatment in many facilities is offered 365 days per year. Holidays you take off are included in the above 3-day absence rule.
