Respiratory Care

A Life and Breath Career for You!
At 9:32 am, Lori Moreno brought a newborn baby struggling to breathe back to life...

What have you accomplished today?

Lori is a recent graduate of a respiratory therapist educational program.

Programs like the one Lori attended are available at colleges and universities throughout the U.S.
Respiratory Care…

a Life and Breath Career for You!

You can live without food for a week, without water for a day, but you cannot live without air for more than a few minutes.

Most people take breathing for granted. For thousands of people who suffer from breathing problems, each breath is an accomplishment.
Respiratory Care…
A Life and Breath Career for You!

Respiratory therapists apply scientific principles to prevent, identify, and treat acute or chronic dysfunction of the cardiopulmonary system.
What is Respiratory Care?

Respiratory therapists have an in-depth knowledge of:

- Cardiopulmonary physiology and pathophysiology
- Patient assessment and cardiopulmonary diagnostics
- Pulmonary disease
- Advanced life support and critical care
- Pharmacology
- Biomedical engineering and technology

Respiratory therapists effectively:

- Assess
- Educate and
- Treat patients with heart and lung problems
What is Respiratory Care?

Respiratory care is focused on:

• prevention
• assessment
• treatment
• management
• control
• diagnostic evaluation
• education and
• care
What Do Respiratory Therapists Do?

- **Respiratory therapists apply:**
  - Critical thinking
  - Patient/environment assessment skills
  - Evidence based clinical practice skills

- **Respiratory therapists:**
  - Develop and implement effective care plans
  - Apply patient driven protocols
  - Utilize disease-based clinical pathways
  - Implement disease management programs
  - Perform therapeutic and diagnostic procedures
What Do Respiratory Therapists Do?

In summary:
Respiratory Therapists work to evaluate, treat, and care for patients with lung and heart disorders.
What Breathing Disorders Do Respiratory Therapists Treat?

- Asthma
- Bronchitis
- Emphysema
- COPD
- Cystic Fibrosis
- Chest Trauma
- Pneumonia
What Kinds of Patients Do Respiratory Therapists Treat?

- Lung disease patients
- Heart patients
- Neuromuscular patients
- Accident victims
- Premature babies
- Children
- Adults
- The elderly
Where Do Respiratory Therapists Work?

- Acute care hospitals
- Diagnostic laboratories
- Rehabilitation and skilled nursing facilities
- Patient’s homes
- Patient transport services
- Physician offices
- Convalescent and retirement centers
- Educational institutions, including colleges and universities
- Industry
Respiratory Therapists Perform Patient Assessment

- Patient Interview
  - Cough and sputum
  - Breathlessness and wheezing
  - Chest illness
  - Smoking
  - Occupational history
Respiratory Therapists Perform Patient Assessment

- **Physical Assessment**
  - General appearance
  - Vital signs
  - Chest inspection
  - Breath sounds
  - Percussion / palpation
  - Bedside assessment of cardiopulmonary function
    - (SpO$_2$, Peak Flow, FEV$_1$, VC, IC)

- **Respiratory Care Plan Development & Implementation**
Respiratory Therapists Perform Diagnostic Procedures

- Arterial blood gas analysis
- Pulmonary function studies
- Sleep studies
- EKGs and cardiac tests
- Sputum specimens
- Stress and exercise testing
Respiratory Therapists Perform Therapeutic Procedures

- Oxygen administration
- Medication administration
- Secretion management
- Chest physiotherapy
- Lung expansion therapy
- Pulmonary rehabilitation and disease management
- Smoking cessation
Respiratory Therapists Work in the ICU

- Adult, pediatric, and neonatal ICUs
- Mechanical ventilation and life-support
- Arterial blood gases
- Physiologic monitoring
- Airway care
- Intubation
- Oxygen and aerosol therapy
In What Areas Do Respiratory Therapists Receive Instruction?

- **RT students gain experience in a variety of areas:**
  - Medical and surgical areas of the hospital
  - Intensive care units (adult, pediatric, neonatal)
  - Emergency room
  - Patient transport
  - Pulmonary rehabilitation and disease management
  - Cardiopulmonary diagnostics (pulmonary function testing, sleep lab, exercise testing, invasive and non-invasive cardiology)
  - Outpatient clinics and physician’s offices
  - Home care
How Does the Job Market Look for Respiratory Therapists?

• The U.S. Bureau of Labor Statistics (BLS) lists Respiratory Care as among the fastest growing professions.

- the opportunity to become a respected member of the health professions

A life and breath career for you!
When Should I Start Thinking About a Career in Respiratory Care?

• NOW!
• Visit a Respiratory Care educational program at a local college or university
• Visit a Respiratory Care Department at a local hospital
• Call the American Association for Respiratory Care (972) 243-2272
• Visit the AARC web site at www.aarc.org
How Do I Become a Respiratory Therapist?

• **Associate Degree**
  – 2 year program
  – Community or technical college
  – **CRT and/or RRT credential**
How Do I Become a Respiratory Therapist?

- Bachelor of Science Degree
  - 4 year program
  - Four-year college or university
  - RRT credential
  - Opportunity for leadership
    - management and supervision
    - education or research
    - clinical specialization
What Courses Do I Need to Prepare for an RC Education Program?

- Prerequisite coursework dependent upon which degree program you enter.
- Students should have a strong background in Math and Science.
Respiratory Care Program
Requirements for Admission

• Prerequisite courses
  • General education
  • Math and science

• Other admission requirements
Respiratory Care Program Curriculum

- General Education Courses
- Science Courses
- Respiratory Care Theory Courses
- Laboratory and Clinical Courses
How Do I Apply to the Respiratory Care Program?

• Application deadline
• Application procedures
  – Testing
  – Transcripts
  – Other
• Program classes begin on __________ date.
